- You can use the macro recorder to record macro codes by simply click the "Record Macro" button. You can edit the recorded macro codes later by clicking "edit macro" button. - With the recorded macro codes, you can do various complicated video manipulating tasks with ease, like controlling the video brightness, changing the video playback speed, selecting different video formats and so on. - The recorded macro codes are saved to a text file on your hard disk, and you can copy them to the Clipboard. You can insert them into your C# program source code directly, or you can copy them to a text editor for easy editing. - In addition, you can export the recorded macro codes to a PDF file by clicking the "Export Macro Code as PDF" button, so you can easily print the recorded macro codes out and keep them in your desktop. - You can use the image previewer to test the video format conversion effect on the selected image. In addition, you can play the image preview as a video preview, so you can see the effect of video format conversion more clearly. In addition, this application can be used to capture the screen video and save it to a file as a video stream. This is very useful for capturing video streams and capturing the desktop video for online videos. It can be used to do live video conversion. Sample Application: (Of course you can add more items to the list to show.) Desktop Video Capture: 1. Select the top item "Capture Desktop Video" from the "Desktop Video Capture" section. 2. Select a target video from the list of video source devices on your system. 3. Press the Record button, the system will capture the screen video and save it to a video stream file as a video file. 4. Press the Stop button, the system will stop capturing the video file. 5. Press the Open button, the system will load the saved video file for preview. Macro Code Recording: 1. Select the top item "Record Macro" from the "Macro Code Recording" section. 2. Press the Record button, the system will record the selected macro codes. 3. Press the Stop button, the system will stop recording the macro codes. 4. Press the Open button, the system will open the recorded macro codes for easy editing. Note: You can also use the "Rename" item to change the name of the macro file. Macro Code Editor: 77a5ca646e
