Directly impacting next-gen consoles including PS3 and Xbox 360, IGN has been reporting an unconfirmed rumor that a new Call of Duty title is in the works at Infinity Ward, codenamed 'WW3'. GameSpot previously reported that a project developed by Infinity Ward was listed on the back of the developers' hands during GDC, and since then rumors about the project have increased. The game is said to be much more original and open than the series you already know, and is said to feature a full online mode. Its setting is said to be similar to the timeline between World War I and II, with the game said to be set in the aftermath of the Second World War. Infinity Ward previously released Call of Duty 2, Call of Duty 4: Modern Warfare, and Call of Duty: World at War. The developer also released Call of Duty: Black Ops, Call of Duty: Black Ops 2, Call of Duty: Modern Warfare 2, and Call of

Duty: Black Ops 3. This new entry in the series is said to be about a new generation of soldiers, instead of focusing on the lives of specific characters. It may also include a 'real-time' setting for combat. In the previous year, rumor of a new Call of Duty game developed by Infinity Ward has been doing rounds, also on the back of a similar listing that appeared on the back of the hands of the development team during GDC. This new Call of Duty is said to be an online only, non-multiplayer game, and is said to be developed for next-gen consoles including PS3 and Xbox 360, marking the first time that the franchise will be developed for a console other than its own. Another development studio, Treyarch, is working on Call of Duty 7, Call of Duty 8, and a new title named Call

Aichi Prefecture, Japan(CNN) Iraq's foreign minister on Thursday called President Donald Trump "flippant" for tweeting that the Middle East country "would be fighting ISIS and all would be peace, no USA military stationed (some should stay) in Iraq to protect the fake embassy." Iraqi Foreign Minister Ibrahim al-Jaafari called the tweet "completely unacceptable," and tweeted his own statement on the issue. "I declare that in light of the irresponsible statements, which were flippant and do not reflect a true understanding of the situation in Iraq and the region, the Iraqi government considers that the United States of America ended its remaining commitment in Iraq," Jaafari wrote. This is a mod, it requires use of NSIS (down below in step 2) In case you didn't know NSIS stands for 'National Software Installation System' there is no english language explanation for this, but in the event that it is likely that the site you are on is requesting you activate it. We will translate the instructions as they appear. Install it using the settings below, and agree to the terms.

We have tested the installer for any conflicting features on Cnchi, which gives you the ease of use by default, so you can choose to install without NSIS. Please add NSIS under advanced installation screen menu Please note that before installing, make sure you have ensured no other NSIS software is running (this will tell you if any are there).
